

## Mission Centric Human Performance Interest Group

Members present: 2 attendees, 1 presenter, 1 chair.

Represented: MITRE & Draper Laboratory

Agenda: Dr. Bowman was unable to attend. Darren Cole (TAG Chair) took over in her place. We did not cover any Interest Group business (no topics available). Note: Attendance was very low. This could have been due to the CAPT Schmorrow presenting in the other conference room at the same time, or it could be an indicator that interest in the group is decreasing.

Abstract: Sylvain Bruni, Aptima Inc. Capturing, Measuring, and Visualizing Distributed Team Collaboration using the Collaborative Visualization Environment (CoVE).

CoVE allows researchers to view many different performance measures in real time during a distributed team operation or simulation. The whole process can be recorded for review later as well. The team members can be located anywhere and the type of information (ally or general) can be separated so as not to provide sensitive information to participants that are not necessarily friendly to the USA.

No issues discussed.

No elections.

No open actions.

Chair: Darren Cole for Dr. Elizabeth Bowman
